

Security For The Farmer

DURING THE PAST FEW YEARS Canada has enjoyed a period of unprecedented prosperity. Industrial expansion has taken place on a very large scale and incomes have risen rapidly in that field. It is interesting to know that agriculture has likewise prospered during this period and that farm incomes have also risen, enabling many farmers to substantially improve their financial positions. It has been an accepted fact, in the past that as a whole farmers did not receive a large share of the national income, and it is gratifying to learn that it is no longer the case. That increased farm income is being wisely used is demonstrated by figures which have been made public by the Dominion Bureau of Statistics, showing the reductions which have been made in farm debts in the past few years.

Debt Reduced On Prairies

The Dominion Bureau of Statistics has reported that in 1946 the number of farms on which there were mortgages or debts on lands or buildings was reduced by 42 per cent. Mortgage debts on buildings and lands in the prairie provinces in 1941 amounted to \$173,102,500. In 1946 this figure had dropped to \$80,441,000 which was 35.5 per cent. below the total for 1941. The report showed that the greatest drop had taken place in Saskatchewan. In the same period, agreements for sale debts in the prairie provinces dropped from \$123,380,800 to \$80,043,500 or by 34.9 per cent. In this case, the reduction in Alberta was greater than in either Saskatchewan or Manitoba.

Living Costs Have Risen

While debts on lands and buildings have been substantially reduced, the farmer like all other citizens has had to contend with rising operating and living costs. April of this year the index covering the farmer's operating and living costs to the recent level of 100 with costs in the years 1935 to 1939 as a basis of 100. Farm machinery was one of the first articles from which price controls were lifted, and there have been rises also in taxes, wages for farm help, oil, and many other things. Farm income in the first quarter of 1946 was \$64,562,000 more than in the same period in 1947 and \$105,017,000 more than in the first three months of 1946. While they have had to meet rising costs, it is gratifying to know that farmers have taken advantage of the present period of prosperity to substantially decrease their debts and thus increase their present and future security.

BAILED TOMATOES WITH CHEESE

4 large tomatoes
1 teaspoon salt
1 teaspoon pepper
1 cup corn flakes
1 teaspoon paprika
2 cups milk
1 cup grated soft butter

Wash tomatoes, remove stems and cut crosswise. Place cut side in baking pan; sprinkle with salt and pepper. Cook about 15 minutes. Drain, mix with paprika and milk of butter. Cover each tomato half with grated cheese, sprinkle with crumbs. Bake in moderate oven (350 deg. F.) about 20 minutes. Yield: 8 servings.

STUFFED POTATOES

Select medium-sized, smooth-skinned and potatoes. Bake in a hot oven (450 deg. F.) until tender, about 20 minutes, being careful not to brown the skin. Cut the potatoes in two, lengthwise, remove the potato pulp, being careful to leave shells unbroken. Mash the hot potato, add either milk or cream as for mashed potatoes.

Season as follows: To each cup of potato add 1 teaspoon salt, 1 teaspoon pepper, 1 teaspoon onion juice and 1 teaspoon butter. Fill the shells with this mixture, rounding the surface so that it is the shape of the original potato. Bake for 10 minutes in a hot oven. Grated cheese may be sprinkled over the top.

BEARS IN MAINE ARE KEEPING UP TO DATE

AUGUSTA, Me.—The "new look" for bears this season includes a traveling bag.

Game Warden Charles Harmon of Aroostook County reported to the state fish and game office here that he chased a black bear that was carrying such a bag.

"I didn't get close enough to shoot the bear," he said, "but I scared it so that it dropped the bag in flight. Among other things, the bag contained a lipstick."

NEW GOLD DISCOVERIES

EDMONTON, Alta.—The Edmonton Journal, in a newspaper story said that spectacular gold discoveries about 150 miles northeast of Yellowknife in the Northwest Territories may prove to be the most important extension of the mining field since 1920's.

While they have had to meet rising costs, it is gratifying to know that farmers have taken advantage of the present period of prosperity to substantially decrease their debts and thus increase their present and future security.

STAYED TOGETHER—This is the flooded out Mission-Matquai Club and its leader, H. Borg.

Although all members were flooded out when the Fraser dykes broke in May, they stuck together, and here they are at Mission Fair.

FUNNY And OTHERWISE

Little Willie tugged at his mother's apron strings. "Ma, didn't I hear you tell Aunt Mary I have your eyes and daddy's nose?" "Yes, you did," said his mother indignantly. "Well, look at me now!" said Willie. I've got Grandpa's teeth."

Junior: "My teacher said the world revolves on its axis."

Senior: "You must have misunderstood her, son. The world revolves on taxes."

A worried-looking man rushed into the florist shop and demanded three potted geraniums.

"I'm so sorry," said the clerk. "We're out of geraniums right now. We have some lovely petunias."

"Nope, they won't do," replied the man. "It was the geraniums I promised my wife to water while she was away."

Mrs. Henpeck: "Everything is going up."

Mr. Henpeck: "Oh, I wouldn't say that. For instance, there's your opinion of me, my opinion of you, and the neighbors' opinion of us, but."

"I'm saving money for my next term, Dad," announced Ralph. "I'm staying in the same form, so you won't have to buy new books."

"You had better be careful of books, but you should have more shelves."

"I know, but nobody seems to lend me shelves."

Nervous passenger: "What if a bridge has been hit and the train falls into the river?"

Guard: "That's all right, sir. We have plenty of trains."

A fellow was sitting in a doctor's office, when another patient anxious to get into a discussion of symptoms, asked him what he was there for. The first patient replied: "A couple of months ago I swallowed a handful of 2-4-D with perfect safety."

"Really?" said the second patient. "What was the reaction?"

"I wait," said the first patient. "I haven't been bothered with moths since."

Hardy Little Holland Quietly Seeks to Reconstruct Industry, Better Economy

The Queen—Specially posed photo of Queen Wilhelmina for the 25th anniversary of her reign.

The old and the new—A swank 1935 model car surges past one of Holland's old and picturesque windmills. Though Holland strives for progress it won't abandon wooden shoes, windmills or tulip gardens.—CPO photos.

By PAUL A. SHINKMAN
Central Press Canadian

THE HAGUE, Holland.—Wooden shoes, windmills, tulips and canals are the mainstay of Holland's international relations long enough.

Now they are going to have to move over and make room for more realistic, if less picturesque, international ties based upon political, economic and industrial considerations.

That is the general opinion expressed to this Central Press correspondent by such active young figures as the Dutch government as J. van den Beugel, foreign office expert on the Marshall Plan; Max Weinglas, of the ministry of economic affairs; and H. G. Hermans, political aide to Prime Minister Louis J. M. Beel.

The Dutch government has no desire to abandon as lost its greatest industry which was shattered by the war. A quick look at the country reveals that the canals, the dikes, the Zuyder Zee, and the national customs and dress are as picturesque as ever.

"However, there is a new side to the picture," says Weinglas. "The 105 million dollars which were transferred in loans and grants to the Netherlands under the Marshall Plan during the second quarter of this year prevented the downfall of the national economy. These funds are not being used to make high life, or even to feed our people. Nobody is starving."

"The money," Weinglas explained, "is being used to reconstruct our industry so that increased production can bring greater dollar imports—our greatest need."

"In other words, we are putting the Marshall Plan aid to work as an investment in our economic and industrial rehabilitation."

Industrial Europe is nationalization-conscious these days, largely because of Britain's experiments under the Labor government. However, according to this spokesman, the Dutch are not nationalization-minded.

He points out that five of the country's eight coal mines are nationalized and the remaining three are controlled by the government, but that the steel industry is not nationalized and that of the two or three minor strikes since the war—notably in the machine industry—one was arbitrated by the government and the others were settled by the operators and workers themselves.

To the foreign observer, the Dutch man-in-the-street has this summer given perhaps the most convincing demonstration of steadiness of political nerves that the world has seen since the war. Within the short space of 10 days recently, Holland saw the following march of events:

- 1.—The nation marched to the polls for its general election (every four years).
- 2.—A slight shift in popular sentiment, mostly to the right, threw upon prime minister, at the resignation of the queen, the responsibility of forming a new cabinet.
- 3.—The foreign ministers of the five western European nations comprising the Western Union, met in The Hague for a weighty conference on Berlin and indirectly Berlin's hands.
- 4.—Crown Princess Juliana took her first big step as regent for her

New Cloth Stops Revolver Bullet

WASHINGTON.—Standing 10 feet away, a Washington policeman plunked a .38 revolver bullet into a cloth target and blinked at what happened.

The bullet went about half way through, then flattened out.

While the policeman stared in disbelief, a chuckle arose from a spectator. Dr. Raymond Seymour of New Brunswick, N.J., knew the "cloth" target was a new plastic material.

Earlier, Dr. Seymour had told the American Chemical Society the material is "stronger than steel" on a pound-for-pound basis.

The sample was a multi-layered "sandwich" of woven glass fabric and a resilient plastic material. It was a quarter-inch thick.

Seaweed Industry Feasible At West Coast

VANCOUVER.—The B.C. Research Council believes a "small-scale" kelp extraction and processing industry could be set up in this province.

In a progress report issued recently on research work which started in 1944, the council said that a sufficient number of kelp seaweed deposits are commercially available in the Pacific coastal waters to justify the establishment of an "alginate" industry here.

Officials would not say what the words "small scale industry" meant in dollars and cents.

"But," they say, "it certainly wouldn't be a million dollar industry."

Algin, an extraction of kelp, is used to make ice cream, whipped cream, and bakery products more soft and elastic.

The research council found that the kelp found in coastal waters along the B.C. Mainland is of a higher quality than that found along the American west coastline.

At present, alginic acid, the kelp extract, is selling at approximately \$1 a pound.

Infra-Red Rays Used In Protecting Produce From Frost

NEW YORK.—The same infra-red rays that enabled miners in the second world war to see in the dark have been put to work protecting fruits and vegetables from frost.

Stateways, magazine of the American iron and steel institute, said the device using the rays could save \$500,000,000 worth of crops annually.

As techniques for use of the machine develop, the publication said, six weeks or even two months may be added to the growing season for many crops.

London's famous No. 10 Downing street was first occupied by a prime minister in 1704.

Building Houses In Turkey Is A Furious Dusk To Dawn Scramble

ISTANBUL.—In Turkey they say houses rain from heaven. A new suburb of Istanbul is called just that, gece kondu evleri, or "houses from heaven". Like mushrooms, these houses grow from dusk to dawn. The Turks have their own magic to solve housing shortage: a built-in loop-hole in the building code.

"The code says any man can build a house—if he has a building permit. The trouble comes in getting the permit. Officials in Turkey are particularly stingy because building materials, although unrationed, are needed for essential public projects."

So, if a Turk decides to materialize his post-war ivy cottage dream without the rascalement permit, unsympathetic police are likely to tear it down.

The gimmick in the building code says that if the Turk manages to get a roof over his house before the police catch up when he is inside the law, what's more, the police not only have to leave the house alone, but also give the builder a permit to finish it.

Consequently there's a brand-new boom in black market housing.

It works this way:

A contractor finds a man who has been camping on the doorstep of the housing authority begging a permit. He offers to furnish the house—ready to finish it.

City Of Edmonton Looking For Planning Experts

EDMONTON.—With the northwest airport chain and Alaska Highway at its front door and Canada's No. 1 oilfield at its back, with 125,000 population—up 8,000 in the past year—and an \$18 million 1948 building program, Edmonton wants to know where it's going.

City council has adopted in principle a scheme for a complete civic survey by authorities on civic government and community planning; instructed Mayor Ainslie to name a three-man committee to find the experts.

Their first job: examine the whole administrative organization, present physical condition and development plans, then and propose improvements.

Need for replanning was emphasized in a dispute this year in re-zoning property earmarked for a civic center to permit construction of a \$6 million hotel. Other demands and issues before council: More paved roads in Edmonton's area of 42 square miles; violent debate before parking meters were decided upon as one answer to downtown traffic difficulties; changing from street cars to buses now nearly completed; better transportation, street lights and telephone in fast-growing outlying big spending for new schools, improving and extending bridges over the North Saskatchewan River; increasing water pressure, and even mosquito control.

Quick Cross Stitch

HUNGRY AS A BEAR

7314

FRISKY AS A PUP

Just six cross-stitches to the inch! These gay and frisky little motifs are so easy to embroider for kitchen towels, book linings, etc.

Give these to daughter for her first embroidery! Pattern 7314; transfer, 4x6 inches, 12¢.

Our improved pattern—visual with easy-to-read charts and photos—complete directions—makes needlework easy.

To obtain this pattern send twenty-five cents (stamps accepted) to Household Arts Department, Wimping Newspaper Union, 173 Melbourne Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Helpful Hints

It's important to wash dirt cloth often, since a dirty cloth cannot take up dirt effectively.

A long-handled duster is a good investment for any housewife since it saves stooping and saves her energy.

After washing blankets, brush them with a stiff brush to raise the nap and press the binding with a warm iron.

New household aid is a transparent plastic bag filled with a chemical solution which may be heated up in boiling water for use as a hot water bottle or chilled in the freezing compartment for use as an ice bag. Chemical solution is electrically sealed in the bag.

"KITTY" GETS \$15 YEARLY FROM CIVIC PAYROLL

CORAL GABLES, Fla.—This city pays an old cat, named KITTY, \$15 a year.

Kitty showed up at the city payroll yard eight years ago, maintenance superintendent Truman Smith explained, when rats and mice were about to take over the garage.

Kitty set about riding the place of vermin in exchange for milk and a place to raise a family.

She has a young "appropriation" ever since. It's listed under the vague heading of "shop over-haul" but don't let that fool you—it's milk for Kitty.

Smith estimated that Kitty has mothered about 20 broods of kittens since she has been around.

BARNYARD ECONOMY

Said the big black rooster to the little red hen: "You haven't laid an egg since the-Jard-knows-when."

Said the little red hen to the big black rooster: "People are saying 'em."

As often as they utter.

—T. M. CFP, in Ottawa Citizen.

Caracas, the capital of Venezuela, was founded in 1567.

Autumn Will See Mildly Wearing Suit And Matching Topcoat

Suits with matching topcoat will be the mood for autumn, fashion experts claim. The bottle green suit, (left), is the kind that you'll wear a long time before you get money's worth. Colors match the topcoat and suit, (centre), which is the ideal combination for fall wear into winter. Another suit is shown, (right), that you can wear to the office and for that "special" occasion. It comes in cinnamon bronze and is made of gabardine.

Tank for Cooling Milk

PROPER means of cooling milk are essential to the production of a first class product. It is desirable that milk be cooled quickly for best results, then kept at a low temperature. The health inspection service of most cities ask for the storage of 2 1/2 to 3 tons of ice per cow where ordinary methods of milk cooling are used. It should be of particular interest to dairy farmers, therefore, that with a properly insulated cooling tank a little more than a ton of ice is sufficient to cool 33 lbs. of milk per day during the six warm months of the year, all the cooling to be done with the ice. This takes care of 8,000 lbs. of milk during the six months mentioned, which is considerably more than the average dairy cow will give during this period of time.

It would seem logical to ask, therefore, why put up 2 1/2 tons of ice per cow when 1 1/2 tons will do? In an ordinary concrete tank about half of the ice put into it is wasted cooling the soil and air around the tank. If a tank is properly insulated, however, this loss is reduced to a comparatively small amount.

Freshly drawn milk has a temperature of about 68 degrees Fahrenheit, and for best results it should be cooled to 50 degrees, or less, within two hours after milking. To extract the heat from a given quantity of warm milk it requires a definite amount of refrigeration, or stored cold, to absorb the heat. This refrigeration is supplied either by melting ice or by a refrigeration machine, usually driven by electricity. Recent studies of this problem have shown that to cool 100 lbs. of milk to a temperature of 48 degrees in 12 hours takes 12 kilowatt hours of electricity or 40 lbs. of ice. Insulated tanks, of course, are essential not only for economical cooling but also to secure the degree of cooling necessary for a first-class product.

The size of the tank needed will depend on the number of 8-gallon cans to be cooled at one time, plus the necessary cooling water and ice. To obtain the necessary capacity of refrigeration storage in the form of ice water there should be three times as much water in the tank as there is milk in the cans.

The tank should not be deeper than necessary to permit the cover

to close over the tops of standard cans, as excessive depths only add to the labor of lifting the cans out, and the depth of water need not be greater than sufficient to reach the necks of the cans. The accompanying table gives the dimensions of several convenient sizes of tanks for different sizes of dairy units. It should be noted that a standard 12 in. is used in all sizes, the variation being in the length only.

The important thing in the construction of an insulated tank of this kind is, of course, the insulating material. A great deal of research work has gone into the development of the best forms of prepared insulation for this kind of milk-cooling tank. Not less than 3 inches of the material is advisable, and it should be made up either of compressed cork sheeting such as is used in the construction of refrigerators, or of any of the wood pulp insulating boards now on the market. Several firms interested in the insulating material trade are printing herewith specially sealed sheets or cakes of this insulating material in shapes and sizes which fit the standard tanks with a minimum of cutting. It should be remembered that it is extremely important that these insulating packages remain permanently dry, because any insulating material loses considerably of its insulating value when it becomes impregnated with moisture.

In building one of these insulated tanks the best procedure is to lay the floor of the tank first, placing in position the drain pipe together with the fittings for the overflow pipe. When this is completed the insulating material is put in position both on the floor and in the side walls, then outside and inside forms for the walls of the tank are put in place and both walls poured at the same time.

As the concrete walls approach completion, anchor bolts for the wooden frame around the top of the tank and for the iron corner protectors for the front of the tank are placed in the concrete while it is still soft. The cover for the tank is made of a wooden frame filled with insulating material and the under side of it at least should be covered with galvanized iron to keep the insulating material dry.

CONVENIENT SIZES OF INSULATED TANKS			
Capacity of Tank (in Gal. Cans)	Capacity of Tank (in Gal. Cans)	Inside Length	Overall Length

World News In Pictures

SKY-WRITING—Shipwright Joe McDermott of Montreal, who "wrote" over the Canadian National Exhibition grounds at Toronto, works at 10,000 feet where the temperature is inclined to be chilly regardless of earthly readings. Here a feminine visitor to the aerial in the Laurentians where McDermott trains, has a peek at the pipe from which the smoke pours to form the words in the sky. When McDermott "writes", he will do so broadside to the breeze to make sure the letters aren't pushed together.—S.N.S. photo.

PINNED-UP GIRL WINS BEAUTY
QUEEN TRIALS—All pinned-up was Lillian Pentz, 38, a honey blonde competitor in the trials for the western Ontario beauty contest to be held Labor Day. Lillian was all set to parade before the judges when the zipper in her suit refused to "zip". The day was saved with the pin. Lillian then qualified for the finals.—S.N.S. photo.

DISTINGUISHED VISITOR AT ANNUAL SCOUTS' AND GUIDES' RALLY—A keen supporter of the Scouts, Her Majesty the Queen was a welcome visitor to the annual rally of Boy Scouts and Girl Guides at Greenwood, Kansas, Dec. Here she has a special word for District Commissioner Eric Palmer, a pipe with the Hord Scouts.—S.N.S. photo.

GERMAN FAMILIES FOR CANUCK FARMS—First of immigrant German families to reach Canada on their way to new homes in Ontario are Mrs. Ernest Jacob and her daughter, Irma, seen as they arrive to join Mr. Jacob in Morrisburg, Ont. The Jacobs have four boys in Hamburg they hope to bring to Canada soon. Immigrant families are being permitted to enter the country on a special one year's permit. Others are expected to follow shortly.—S.N.S. photo.

CAPT. RAISE BAIL, GANG LEADER WEEPS—Self-styled leader of the Toronto "Beany" gang, Frank Stothers, 21, is shown with officials at Harris, Ont., where with 12 others, he appeared on trial following the Wagsa Beach riot. Remanded a week on assault charge he said "I don't want to go back to jail." The Beany gang leader sobbed: "My folks have deserted me." Four of the gang were freed because of absence of key witnesses.—S.N.S. photo.

BARBARA ANN GETS U.S. VISA—A heart-free Barbara Ann Scott visited H. Earle Russell, U.S. consul-general with whom she is pictured above, and secured her U.S. visa for use "early in the fall", according to the pretty skater. Accompanied by her mother, Mrs. Clyde Scott, Barbara Ann arrived in Toronto for a flying visit and returned to her summer cabin at Brockville, Ont., after the necessary official proceedings to enable her to travel to Hollywood and New York in the near future, seeking fame in the movie world. "The ring which I accepted as a friendship gift from George Fulford, Jr., I returned to him," said Barbara Ann. "It was a beautiful diamond ring which belonged to his grandmother and he wanted me to have it. I guess it was silly of me to wear it, but I did, and then everybody thought I was engaged. I'm not."—S.N.S. photo.

TEST PILOT KILLED—Lieut. William James McQuade, a Canadian test pilot of the Fleet Air Arm, was killed when the Mosquito he was flying crashed near Oulneir, Cornwall, Eng. McQuade, sole occupant of the plane, comes from Toronto, where his wife and family live. He was home on a month's leave a year ago, and started test piloting for the Fleet Air Arm after returning to England.—S.N.S. photo.

DEMONSTRATE JAPANESE DANCES—Japanese dances they learned from the older folk who demonstrated at a summer school in Halliburton, Ont., by Chieo Yangiawana and Ginger Tanaka of Toronto, shown with Mrs. Santa Rao, of India, who will sing classic songs of native land.—S.N.S. photo

NAME LADY BANTING FIRST IN COLLEGE—Lady Banting, widow of the late Sir Frederick Banting, who discovered insulin, has become the first Canadian woman to be awarded a membership in the Royal College of Obstetricians and Gynecologists. Lady Banting, who has been working in a London hospital the past two years, said the result of the examinations in July had surprised her and had convinced her "it was just a fluke."—S.N.S. photo.

VAMPIRE JETS TAKE PART IN THRILLING AERIAL DISPLAY—Chattering with a Canadian National Exhibition visitor Shirley Jordan before he took his Vampire jet up for trial spin is Flt-Lieut. Jack Phillips, veteran of overseas service. Phillips was a crack pilot with the famed City of Edmonton Squadron flying Mosquitoes.—S.N.S. photo.

Heater, like new. Apply to R.A.
Campbell, Carbon.

Pouring of cement has started on
the new sidewalk just the Carbon
Trading Co. store.

Mrs. Charlie Trumbly is visiting
at Nanaimo, B.C. with her son-in-
law and daughter, Mr. and Mrs. G.
I. Reed.

CHEESE FOR BRITAIN

The British Government has pur-
chased 30 million pounds of cheese
including some processed,
through private trade channels
in the United States. Delivery is
to take place between July and
September 1948, and the deal will
be financed through the European
Recovery Program.

FORECAST 372,000,000 BUSHEL WHEAT CROP

Canada's 1948 wheat crop has
been estimated at 372,000,000 bu-
shels, or 31 million bushels greater
than last year, but about 35 million
below the 1938-47 average. The
estimated average yield per seeded
acre is 15 bushels, compared with
14 bushels last year, and the ten-
year average of 17.1 bushels.

Bob Edwards Speaks His Mind on Crime CALGARY EYE OPENER, 1904

Rev. Mr. Kirby has been taking
up the history of Cashel, the mur-
derer rather curiously. Had there
been a panic last Sunday in the
opera house while Rev. Mr. Kirby
was explaining Cashel for the ed-
ification of the vast crowd of cur-
ious men the results might have
been disastrous. The walls fairly bulged
with the squeeze. When a minister
preaches Hell he should have an
absolute curtain ready to drop.
Mr. Kirby certainly showed
much kindness to Cashel during
his incarceration, and helped mat-
terially to mitigate the terrors of
the scaffold. A high estimate has
been put on this labor of love, but
his widely advertised sermon served
the double purpose of ingenious
advertising and a colossal scoop.

We had ourselves intended mak-
ing a try for that manuscript of
Cashel's life but Colonel Sanders
took possession of it and suppressed
it. It would have made a tremen-
dous hit. Another newspaper
man wanted to get it to print in
pamphlet form, turning over the
profits to Cashel's mother. We must
get left. It remained for the con-
demned man's spiritual adviser,
who naturally had the inside track,
to get some exclusive copy and
work it up for the pulpit. It was
a sparkling idea.

Some think it was unseemly to
use the defunct Cashel as an aid
to fill the house but we do not
agree. Newspaper men try to get
spicy stuff. Clergymen have the
same privilege in their own line.
Mr. Kirby was entitled to use his
stuff for all he was worth, which
he did.

Cashel's advice was excellent as
regards cigarettes. Anyone who
smokes these abominable and en-
gaging little paper tubes should
certainly be hanged. His words on
the evil of drinking and gambling
were also good. But the question
arose—if Cashel had a sudden fortu-
nious stroke of fortune had been
liberated the night before his exe-
cution, would the good work of
Mr. Kirby stick? The danger
passed, would he not have walked
jauntily up town rolling a cigarette?

One Wonder.

The mere fact a murderer being
caught and hanged should not en-
hance the value of any moral ad-
vice he has to offer. Had Cashel
been acquitted or sentenced to a
term of imprisonment nobody
would have cared a hoot for his
advice on booze, cigarettes, Nick
Carter, or gambling.

Radiance the Hangman

In connection with the recent
hanging of Cashel, was it approved
by authorities and their idea of
decency that Radcliffe, the hang-
man, should be permitted to hang
around hotels in an offensive state
of intoxication, boasting of his ex-
ploits with the rope, humming
drinks and playfully feeling peoples
necks with his fingers? This no-
torious character made a disqui-
ting exhibition of himself, with his
loud voice bragging and his
coarse jests. He should have re-
mained quietly down at the bar-
racks and left after the execution
or have had the good taste while
in town to conduct himself with
propriety.

Besides what right had he to
peddle off pieces of the rope with-
out a hawk's license? The au-
thorities could have made him
cough up \$25 for engaging in this
unseemingly traffic.

Much sympathy has been ex-
pressed for Cashel's kith and kin.
Is there none left for the family
of the murdered man Russ Bell?

NEW ISSUE SAVINGS BONDS ON SALE OCTOBER 15

Finance Minister Abbott announce-
d last week that the third series
of Canada Savings Bonds will go
on sale October 15.

The issue will be dated Nov. 1,
and will bear interest at the rate
of 3 3/4 per cent a year for ten
years. They may be redeemed at any
time at any bank in Canada for full
face value plus interest.

Mr. Abbott said it is estimated
the national sales force will include
some 8,000 representatives of more
than 300 investment firms. The
bonds also will be available through
more than 3000 branch banks and
other savings institutions.

Some 12,000 payroll establishments
will be provided with information
and material to promote the pay-
roll savings plan.

CANADIAN FOREIGN TRADE BREAKS RECORD

Canadian foreign trade reached
record proportions during the first
half of 1948, with total merchan-
dising imports and exports amount-
ing to \$2,671 million, an increase
of \$85 million over the correspond-
ing period of 1947.

Trading conditions in June, how-
ever, were less favorable than in
the preceding five months of this
year, mainly as a result of the drop
in wheat and flour shipments to
the United Kingdom, following last
year's short crop.

A decrepit horse was being of-
fered to the highest bidder. An
old farmer watched as a young
man in riding breeches bid for the
animal. When the sale was com-
pleted he turned to the young fel-
low. "Tell me, what on earth are
you going to do with that nag?"
he asked.

"Oh," replied the cocky young
sportsman "I'm going to race him."
The farmer took another look at
the horse. "Well, you'll win," he
said.

CHICKENS DISAPPEAR

Martin Dahl of Hanna reports
the disappearance of his flock of
spring chickens. Returning from an
auction sale he was disappointed to
see that 56 chickens had been
stolen.

For every 100 people in Canada
there are 75 cattle and calves, 21
sheep and lambs and 42 hogs, on
Canadian farms. In the United
States there are only 34 cattle and
calves, 24 sheep and lambs and 38
hogs for every 100 people.

Movement of over 4,000,000 bu-
shels of wheat over the Hudson's
Bay route this year is now assured,
said L. F. McIntosh. Last year
4,975,753 bushels passed through the
post.

CANADIAN LUMBER EXPORTS

Canadian lumber exports during
the first six months of 1948, valued
at over \$94,000,000, were three mil-
lion dollars higher than in the cor-
responding period last year. Owing
to economic conditions, several of
Canada's traditional markets for
lumber have purchased less than in
1947, but this slack has been absor-
bed by the increase in exports to the
United States this year.

The 1948 crop of steers at the
Stony Indian Reserve was sold by
tender last week, the 200 head go-
ing to Parslow and Denoon of Cal-
gary for \$21.40 per cwt. The cattle
will be shipped to the United States.
They are said to be not too fat,
and weigh on an average of 850 to
900 pounds. All three beef breeds
are represented with Hereford
characteristics predominating.

PATRONAGE DIVIDENDS 1948-49 CROP YEAR

It is our intention, if earnings permit, to pay
our customers a patronage dividend on grain
delivered made to our elevators during the
1948-1949 crop year.

LADIES' LOUNGE ROOM

TO A SMOOTH RUNNING FARM

Your separator, running at ex-
tremely high speed, needs a
special oil to maintain steady
lubrication and prevent wear and
the resulting bowl vibration.
Imperial Cream Separator Oil is
scientifically made to protect the
close-fitting bearings of your
separator in summer heat and
especially in winter cold when
ordinary oils tend to congeal.

Imperial Penetrating Oil is
especially useful in overhead
jobs for loosening rusty nuts
and bolts. It is also valuable
for curing squeaks and stiffness
in automobile, wagon and car-
riage springs. It works its way
between tightly fitting metal sur-
faces, dissolves gummy sub-
stances and gives real lubrica-
tion.

Powdered mica is one of the
ingredients in this high quality axle
grease that provides smooth
operation for wagons,
spreaders, hayloaders,
etc. A thin film is effective
and long lasting — lu-
bricating even when the
spindle appears dry.
When you buy axle grease
be sure it's "Mica".

These and numerous other
Imperial products needed on the farm are
available from your Imperial
Oil dealer or agent.

It's a private matter

Your bank is there to serve you in a
personal, private way.

When you make a deposit your passbook
is closed to anyone but you and your
bank. When you arrange a loan, that is
strictly between you and your bank.

When you discuss private financial matters
with your bank manager, you know they
will stay private.

Such privacy is the very essence of
Canadian banking. It permits you to deal
with your bank and to use its
many services on a basis of complete
confidence and trust.
